DESCEND | DN8

Subwoofer for Both Music and Home Theater

The Definitive Technology Descend DN8 is an advanced, compact subwoofer designed in California for both music and home theater. Powered by a 500W peak Class D amplifier and an 8" driver that's pressure-coupled with two 8" Ultra Low Bass Radiators, it delivers powerful bass with amazing speed, musicality, and control.

SERIES FEATURES

Deep Transcending Bass for Home Theater and Music

Powered by a 500W Class D amplifier, the DN8 features a new 8" driver, pressure-coupled to two 8" ultra-low Bass Radiators that deliver powerful bass with amazing speed, musicality, and control while playing as low as 34Hz. Feel and hear every detail as you rediscover your favorite movies and music.

Dual 8" Bass Radiators

The DN8 is outfitted with dual 8" Bass Radiators that are pressure coupled to the 8" driver. The custom Bass Radiators enable the DN8 to play louder and lower with less distortion than traditionally ported subwoofers.

Universal Compatibility

The DN8 is the perfect complement to any home theater system, you can easily connect via LFE or stereo line level RCA inputs (cables not included).

Modern, Minimalist Design

The non-resonant cabinet is beautifully designed and available in two modern, acoustically transparent colors: Midnight Black and Glacier White.

Top of the Line Class D Digital Amplifier

Equipped with a 500W peak Class D digital amplifier, the Descend DN8 has enough power and efficiency to play as low as 34Hz.

Complete Control

Built-in controls for variable volume, low pass filter and phase (0/180°) for optimum bass levels. Set power toggle to Auto on/off or DC control for fast and easy on/off power switching in the sub and other home theater equipment—all easily accessible on the back panel.

Limited Warranty, Built to Last

Designed in California, engineered in Baltimore and manufactured under the strictest quality controls, Definitive Technology speakers and subwoofers are built to sound as good as they look. All Definitive Technology products come with a limited warranty (1 year on amplifier, 2 years on driver).

SPECIFICATIONS	
Product Weight	27lbs
Frequency Response	34Hz – 200Hz (- 3 dB) Low Pass Control: 60Hz to 120Hz
Amplification	Class D amplifier 200W continuous / 500W Peak (<1% THD)
Volume Control	Subwoofer volume control knob
12V Trigger	none
Phase Adjustment	Toggle Switch 0 / 180°
